

C2 Development Ideas

Web Application: ASP.NET, Golang

Implants: C, C++, Golang, C#

Database: MSSQL, MySQL

Hardware: Rubber Ducky Implementation

Implants need to implement system enumeration such as Architecture, Network Information, Windows Version, Hardware Information. So it has to rely heavily on the Windows 32 API or if its a linux target then implement accordingly

lenguajes:

- Golang
- C#
- C++
- Python
- C
- Boolang

Base de datos:

- MySQL
- MSSQL
- Redis

Hardware:

- Rubber Ducky
- Bluetooth device for reverse shells

Customization:

- APIs with documentation
- Generated binaries will use templates inside the webpage
- Shellcode templates

Channels:

- TCP
- UDP
- HTTP
- SMB
- Twilio API
- Pastebin
- Twitter
- Bluetooth
- ICMP
- DNS

Exfiltration:

- FTP
- SMB
- Through APIs
- DNS over HTTP
- Upload to file sharing site

Encryption:

- Custom XOR
- AES
- DES
- RSA

- SHA
- Base64
- ChaChaPoly
